STERLING[®] oil-water separators

“the product of experience”

STERLING Separation oil/water separators are designed for clean efficient operation and to assist users in maintaining compliance with environmental legislation.

Building on well established principles by adding functionality and quality through creative design, STERLING are committed to producing a product range that equals or exceeds market requirements.

STERLING [®] oil/water separators

CS200-IBCK		£4995.00

STERLING [®] oil/water separators with 'Active Filter' for difficult or emulsified condensates						
Separator Model #	Price	Dimensions and weights are as per standard separator above	Service kit #	Scope of supply as per standard filters	Normal filter life (hrs)	Price
CSR150-AF	£380.00		CSR150-AFK		<2000	£200.00
CSR450-AF	£550.00		CSR450-AFK		<2000	£285.00
CSR1000-AF	£830.00		CSR1000-AFK		<2000	£475.00

Standard Separator specifications assume well maintained compressors and reasonable operating conditions. Performance on mineral or mineral-based lubricants should be as above, irrespective of compressor, condensate drain type or climate, where the condensate produced isn't a stable emulsion. For difficult or stable emulsions choose the CSRxxx-AF range

Polyalkylene glycol (PAG) lubricants present a challenge as they are based on water-soluble material. Un-dissolved components will be removed by these separators leaving a 'clear' outlet fluid, but we advise that the separator should be down-rated to 50% of normal capacity.

The products listed above are specifically designed and manufactured for after-market fitment, with a performance expectation equivalent to the manufacturer's original. Use of the original equipment manufacturers' names does not imply that these items are either bought from them or supplied to them by us. The kits for Atlas Copco, Worthington & Mark utilise a static filter rather than the original floating filter.

Filter Housings and Elements

STERLING filtration products are designed and manufactured to the highest standards.

They are rated according to

ISO8573-1 and are validated according to ISO12500-1 & ISO12500-3.

See specimen data sheet on our website or contact us for further details.

Important Notice

The use of brand names and manufacturers names in this compatibility list is not intended to state or imply that the company sources this product from those companies, nor does it seek to imply that we supply original equipment to them. Such names are included here simply to identify the products for which we offer an alternative.
